DEBATE DEBATE DEBATE
• Vannevar Bush proposed an mechanism that would allow us to understand the coming data rich world that he predicted would materialize.

• Debatably, we have been working towards a modern version of his device, following his aspirations.

• Are the devices of today the promised technology that he envisioned?
Are the devices of today the promised technology that V. Bush envisioned?

- Form groups of three and prepare to argue, in debate style, in both support and against this question.

- Then, after 10min, be prepared for a debates where one member will forward their arguments, another member will offer a rebuttal, and the final member will provide a summary.
