CREATE A LOGICAL VIEW OF CS 150
WHAT THE LOGICAL VIEW SHOULD CONTAIN

• It should be capable of tracking all students in detail.
• Each assignment, including both: the details of the assignment and the breakdown of the student grade;
• Lab exam performance in detail;
• In class performance;
• The ability to track this information from one semester to the next;
• A combined performance and a mechanism for identifying the breakdown of the combined performance from one semester to the next.
